

Improving and assessing skills for civilian peace missions

International Seminar

2-6 July 2006

@ INJEP, 11 rue Paul Leplat - 78160 Marly-le-Roi FRANCE (close to Paris)

This seminar will look at the ways to ensure that Civilians working for peace, especially in regions affected by violent conflict, will gain the necessary skills and know how to improve them.

In this seminar, a selected group of practitioners, candidates for field missions and trainers will go through practical exercise and theoretical debate to share practices and ideas amongst the most advanced organisations in this field. They will have the opportunity to share experiences and expertise, in order to improve together training and assessment techniques.

The outcome of this workshop will influence trainings and practice of a variety of organisations, through the production of a concluding paper, and provide the participants with resources for improving training and assessment in the field of peace work
